

Aesthetic Dentistry

Millard Roth, D.D.S.

Dr. Millard Roth knows how to make his patients smile. The dedicated dentist is skilled in all manner of cosmetic dentistry, including the Invisalign® invisible teeth- straightening system and the renowned Davinci porcelain veneers. And when he's not putting the finishing touches on a smile makeover, he's delighting audiences by playing keyboard in his all-dentist band, Open Wide.

"What I love the most about what I do is making a difference in people's lives," says Dr. Roth. "Changing a person's smile has a dramatic impact on their personal, social, and professional image, but undergoing a smile makeover is a decision wrought with apprehension and emotion. I try to focus on the patient's concerns and

listen to their goals so that we can work together to achieve the desired outcome."

Dr. Roth has a caring and friendly manner that puts patients immediately at ease. With an equal emphasis on dental health and aesthetic results, Dr. Roth uses his skill and experience to assess the specific course of action to help each patient attain their treatment goals. Always fascinated by the art of dentistry, Dr. Roth is devoted to increasing his knowledge in this field, which allows him to offer the most effective and distinctive comprehensive dental care available.

"Dentistry has made great strides in recent years, and we can now perform a complete restoration in as little as one visit," says Dr. Roth. "Patients today want immediate satisfaction—they are not always willing to wait months or even years to attain a perfect smile. Now, with advances in orthodontic treatment, porcelain veneers, and one-hour whitening techniques, they don't have to."

Dr. Roth offers various methods of laser teeth whitening to create a dazzling smile, including a new Australian method that cuts treatment time in half. In addition, Dr. Roth specializes in Chairside Economical Restoration of Esthetic Ceramics (CEREC). With this technology, Dr. Roth can minimize tooth loss, increase the strength of the tooth, and virtually eliminate sensitive teeth. A single tooth can be restored back to its original strength and beauty in less than one and a half hours, without the concerns associated with amalgam fillings.

Born in Burtonwood, England, and raised in Southern California, Dr. Roth is a graduate of the University of Iowa and is certified in both general and cosmetic dentistry. Dr. Roth completed his general practice residency at St. Anthony Hospital in Oklahoma City, Oklahoma. He also graduated cum laude from UCLA in piano performance and music composition, which explains his extracurricular passion!

Because Dr. Roth puts the comfort and health of the patient first, his office utilizes digital X-rays, which reduce radiation by 90%. Patients undergoing treatment are provided with headsets for music or DVD entertainment, and intraoral cameras allow the patient to follow along as work is being done. In addition, Dr. Roth offers gum and periodontal care, oral cancer check-ups, and dental implants.

A believer in giving back to the community, Dr. Roth donates his dental services to Kathy's House, an organization that helps abused, impoverished, or addicted women get their lives back on track. Its purpose is to provide shelter and other needs to women and children in crisis, and fill the gap between short-term housing and permanent housing for families in distress.

"My passion for helping others is what motivates everything I do," says Dr. Roth. "The ability to make someone smile—literally—is powerful. A beautiful smile not only changes a person's appearance, it transforms them from the inside out. That's why my job is so rewarding."
